

modeFRONTIER[®] with InfoWorks[™] CS

the multi-objective optimization and design environment

Save time and money in verifying and optimising drainage network models

Free Introductory Workshop – 14th May 2010

The workshop will provide an opportunity to use modeFRONTIER with InfoWorks CS in a hands-on training day

Objectives:

- To show modellers how to build a model to assist with the verification process
- To teach the basics of the interface and give you the confidence to build your own model
- To develop your skill set and kick-start your training in one of the industry's latest developments

The workshops are held at the International Digital Laboratory, University of Warwick, located in the heart of England, 3 miles from Coventry centre.

For details: <http://www2.warwick.ac.uk/about/visiting/>

Agenda

- 09.45 Registration & refreshments
- 10.00 An introduction to EnginSoft
- 10.15 Introduction to modeFRONTIER workflow and InfoWorks interface
- 10.30 Hands-on: first workflow, first modeFRONTIER runs
- 12:15 Lunch
